Thank you for registering for a course. Our goal is to help you feel more knowledgeable about first aid practices and better equipped to deal with a situation where first aid is required. First Aid courses do require a certain degree of physical activity. For most people, the physical activity involved in a First Aid and/or CPR course should not pose a threat to their health. There are a small number of people who may find the physical activities in a course strenuous. If you have any concerns about the level of activity involved in the course, please consult with your physician prior to attending the course. If you are unsure if you should participate in any aspect of the course involving physical activity, please see the course conductor before the course begins.
